

9/15/25 11:30 am

Phone Conference

Meeting with EPA/Washington Sean Donahue

Who was in attendance: Ana Ortiz and Kathy Freibis

What was the purpose of the call? The SWT-Committee is seeking oversight assistance at the Federal level to resolve the ongoing Oak Run sewer problem and future MCU expansion.

The SWT perspective of the call was hopeful. We spoke for a little over 1-hour and much was discussed. The subject matter is complex and involves numerous County, State and Federal agencies with their own inherited limitations.

The SWT had the opportunity to speak with an official of the Federal EPA and we discussed this Oak Run sewer problem from 20-years past to present day. We previously sent 100's of supporting documentation for their review.

We were told that they need time to review the situation, evaluate what can be done and will notify us when this process is completed.

This process is ongoing.
